## Totally TUBULAR™

### CPP's Quality Upper & Lower Totally Tubular™ Control Arms

Thick tubing and new patented D-Spec heat resistant bushings have driven our Totally Tubular™ Control Arms to the top of the industry's list!

Welded for maximum strength and visual impact. The coil mount has been improved to make installation even easier. The lower shock mount is incorporated into the stamped coil plate and will also accept QA-1 coil over and Ridetech Shockwave™ units as well. This stamping is welded around its entire perimeter.

All arms that contain cross shafts are preassembled with the cross shafts and pivot sleeves and have a safety feature that captures both sides of the bushing, unlike the originals that

were only retained on the one side of the bushing under the head of the bolt. This unique feature allows full control and virtually no flex on the control arm when cornering.

Ask for  
them by  
name!

Complete Sets  
starting at \$733/set

### Helical stamping with coil index, just like the factory with Heli arc welded mandrel bent D.O.M. tubing.

CPP's Totally Tubular™ upper and lower control arms are available in gloss black or silver powder coat and include ball joints.

Built with more ground clearance and designed to work with most after market products like air ride, coil overs, rack and pinion and big brakes.

Self-lubricated and able to withstand temperatures up to 400 degrees, patented material bushing are silent and stronger than polyurethane or delron!

Interlocking design cross-shaft captures both sides of bushing and allows virtually no flex on arm when cornering!
